List of Contents

Volume 7 Number 1/2 **1990**

Manufacturing Systems

G. SPUR — 1 Preface

Papers

G. SPUR — 3 Corporate management in the industrial society of the future

N. P. SUH — 15 University–industry interaction for the innovation of new products and processes: a U.S. model

F.-L. KRAUSE — 27 Knowledge processing for computer-aided product gestaltung

W. EVERSHEIM, H. J. SCHMITZ-MERTENS and U. WIEGERSHAUS — 39 Organizational integration of flexible manufacturing systems in conventional workshop structures

M. WECK — 51 Design management in the face of growing product complexity

H. WILDEMANN — 63 Management of new technologies in production and logistics

H.-J. WARNECKE — 73 Company management between complexity and specialization

S. WALLER — 81 Criteria for selecting control systems in flexible manufacturing

G. NEIPP — 89 Computer-integrated mechanical engineering (CIME)

G. PRITSCHOW — 103 Automation technology—on the way to an open system architecture

H. HAMMER — 113 Demand-controlled production using an interconnected manufacturing system: realization and application

Compendia

W. PLINKE and M. KLEINALTENKAMP — 127 Marketing advantages via new manufacturing technologies

H. K. TÖNSHOFF and H. DITTMER — 133 Object- instead of function-oriented data management for tool management as an example application

W. HANSEN — 143 Market-oriented quality management—a strategy with regard to the single European market

R. SKÅR and R. BALTERSEE — 149 Dialog between demanding customers and leading manufacturers as a recipe for successful growth and change

R. WINTER — 157 Flexible automation for the customer's sake

U. SEIFFERT — 171 The application of computers in automobile development

H. KIRCHER — 183 Information technology prospects for the year 2000

U.S. — Yugoslav Joint Workshop on Robotics and Artificial Intelligence in Computer-Integrated Manufacturing

V. R. MILAČIĆ — v Preface

vi Participants

193 Executive Summary

Workshop Proceedings

199 Subgroup I: The factory environment and systems issues in computer-integrated manufacturing

203 Subgroup II: Intelligent robots and machine tools

207 Subgroup III: Sensors and interfacing

Invited Presentations

V. R. MILAČIĆ — 213 Factory environment and CIM

M. C. MULDER — 229 The barriers to widespread use of intelligent robots and manufacturing machines

M. JAMSHIDI — 243 Sensors and interfacing in robotics and manufacturing

M. E. MERCHANT — 255 World trends of importance to intelligent robotic CIM systems

S. C.-Y. LU — 263 Knowledge processing for concurrent engineering: an evolving challenge in CIM research

D. M. ZELENOVIĆ and D. N. ŠORMAZ — 279 The methodology for design of effective computer-integrated manufacturing systems

B. M. KRAMER and S. S. SHIM — 291 Development of a system for robotic deburring

M. JOCKOVIĆ, M. VUKOBRATOVIĆ and Z. OGNJANOVIĆ — 297 A contribution to the organization of an expert system for process control of FMC

J. LENARČIČ, B. NEMEC, U. STANIČ and P. OBLAK — 303 Robotics research at the Jožef Stefan Institute

T. ŠURINA — 311 Intelligent robots and manufacturing automation

H. S. NA — 315 Artificial intelligence in today's factory

V. DUKOVSKI — 321 Robot accuracy and stiffness — an experimental study

J. D. LEE — 327 Application of optimal control theory to flexible robotic manipulators

D. MILUTINOVIĆ and V. POTKONJAK — 337 A new concept of the SCARA robot

M. C. MULDER, J. SHAW and N. WAGNER — 345 Dynamic stability in bipedal motion: adaptive control strategies for balance and controlled motion

K. F. EHMANN — 357 Solution principles for a new generation of precision self-correcting multi-axis machines

H. CIPOVIC, S. DJURETIC and D. LENGER — 365 Adaptive thresholding in 3-D scene description

R. MARTINOVIC and D. LAZIC — 371 Development of passive sensing as a key to the solution of mechanical integration in CIM by autonomous mobile robots

R. TOMOVIĆ — 381 Advances in the design of autonomous dextrous hands

In response to the constant demand for information in this rapidly-growing field. . .

NEURAL NETWORKS:
Research and Applications

A New Book Series from Pergamon Press!

NEURAL NETWORKS: Research and Applications (NNRA) is comprised of books written by recognized leaders in the field, that cover developments in neural networks research, theory and applications.

Editorial Board:
Shun-ichi Amari, University of Tokyo
James Anderson, Brown University
Gail A. Carpenter, Center for Adaptive Systems, Boston University
Rolf Eckmiller, University of Düsseldorf, FRG
Eric Schwartz, New York University
Stephen Grossberg, Center for Adaptive Systems, Boston University
Allen S. Selverston, University of California, San Diego
Bernard Soffer, Hughes Research Labs, Malibu, CA

NNRA welcomes the submission of manuscript proposals. To submit a proposal or for further information contact one of the editors above or write to Editor, NNRA, Pergamon Press, Inc., Maxwell House, Fairview Park, Elmsford, NY 10523.

◆ ARTIFICIAL NEURAL SYSTEMS
Foundations, Paradigms, Applications and Implementations

by **Patrick K. Simpson**, General Dynamics Electronics Division, San Diego

For the first time in one concise volume, a broad range of Artificial Neural Systems models are clearly described within a common framework. The author includes a comparison between real neural systems, artificial neural systems and the conventional computer, a presentation of the foundational concepts and constructs used to analyze and characterize ANS's, and a history of the field since the early 1940's. The remainder of the book analyzes 28 ANS paradigms, their applications and implementations. An extensive bibliography is also provided.

224 pp.	1990	softcover	ISBN: 0-08-037894-3	$19.50
		hardcover	ISBN: 0-08-037895-1	$39.50

◆ NEURAL DYNAMICS OF ADAPTIVE SENSORY-MOTOR CONTROL, Expanded Edition

by **Stephen Grossberg**, Center for Adaptive Systems, Boston University &
Michael Kuperstein, Neurogen, Brookline, MA

The first title in this new book series, Neural Dynamics of Adaptive Sensory-Motor Control, Expanded Edition, offers the most advanced theory to date of a complete self-organizing neural network architecture for a biological system. This expanded edition contains important new information on arm movements and eye-hand coordination. Written by leaders in the field, the book features chapters that describe, in-depth, fundamental design constraints and the self-adaptive circuit realizations of these constraints needed to generate accurate eye and arm movements in response to visual signals. The authors provide many important new insights into the design of autonomous adaptive robots. Their conclusions demonstrate that learning capabilities are central to these designs.

460 pp.	1989	softcover	ISBN: 0-08-036827-1	$35.00
		hardcover	ISBN: 0-08-036828-X	$50.00

Prices and publication dates are subject to change without notice.

AUTOMATICA

THE JOURNAL OF IFAC, THE INTERNATIONAL FEDERATION OF AUTOMATIC CONTROL

Editor-in-Chief: **G S AXELBY,** *211 Coronet Drive, North Linthicum, MD 21090, USA*

The journal publishes papers on theoretical and experimental research and its practical application to all types of control systems.
Topics covered include: the theory, design and characterization of control systems and components, the reliability of components and systems, data processing and computers for control purposes, computer-aided design and manufacturing and control of various industrial processes, space vehicles and aircraft, ships, traffic, biomedical systems, national economics, power systems, agriculture, and natural resources. The journal also includes the following special features: survey papers, book reviews and technical communiques.

A Selection of Papers
P M FRANK (FRG), Fault diagnosis in dynamic systems using analytical and knowledge-based redundancy: a survey and some new results.
Y LIU & B D O ANDERSON (Australia), Frequency weighted controller reduction methods and loop transfer recovery.
M SZNAIER & M J DAMBORG (USA), Heuristically enhanced feedback control of constrained discrete-time linear systems.
M S RADENKOVIC & S S STANKOVIC (Yugoslavia), Strong consistency of parameter estimates in direct self-tuning control algorithms based on stochastic approximation.
B LENNARTSON (Sweden), On the choice of controller and sampling period for linear stochastic control.
S MURATA, Y ANDO & M SUZUKI (Japan), Design of a high gain regulator by the multiple time scale approach.
J NOVOVICOVA (Czechoslovakia), M-estimators and gnostical estimators for identification of a regression model.
